Strong  
&  
Lightweight

# TILE-TITE™

## Roof Tile Mortar

**Tested and Approved for All Tile Roof Profiles**  
Lightweight compared to sanded Mortar and Mixes dry, wet, or set.

**A 40 lb bag of Tile-Tite once properly mixed with approximately 3 - 3.5 gallons of water, expands to at least the equivalent of a heavy 80 lb bag of sand and cement.**

With Tile-Tite you will be using a superior, stronger, lighter product versus sanded mortar mixes. A 40 lb bag fills a 5 gallon bucket and will still be light enough to bring up to the roof, and a 10" trowel heaped with Tile-Tite only weighs half that of a trowel with sanded mortar.
